

Notice signs are used to communicate general information regarding company information, house-keeping, instructions or other messages that assist both visitors and personnel on your site.

There is no Australian Standard for notice signs, however they are included due to their general nature and mass application.

This category includes our core range of notice signs, however we can also produce signs with custom messages upon request.

Notice signs are available in a variety of standard sizes. They can be manufactured on metal, polypropylene or corflute material, or can alternatively be supplied on self-adhesive vinyl labels. Aluminium signs are also available upon request.

Standard sizes and materials are listed in the table below each sign, along with the relevant part code. Other sizes are also available upon request, i.e. 900mm x 600mm.
