

Prohibition signs

Prohibition signs are used to indicate that an action or activity is not permitted.

These signs feature a symbolic shape comprising a red annulus and slash symbol with a plain white interior. Black wording may be placed below and where appropriate, a black pictogram is placed behind the red symbol.

The no smoking sign is a common prohibition sign found in many locations.

Our prohibition signs are made to the specifications of AS1319-1994 and are available in a variety of standard sizes. They can be manufactured on metal, polypropylene or corflute material, or can alternatively be supplied on self-adhesive vinyl labels. Aluminium signs are also available upon request.

Standard sizes and materials are listed in the table below each sign, along with the relevant part code. Other sizes are also available upon request, i.e. 600mm x 900mm.
