

Multi-message signs are used for traffic management in temporary roadwork conditions. Where applicable, their designs are based on guidelines issued by state Road Authorities in Victoria, South Australia, Queensland and Western Australia.

These signs are loosely grouped according to intended use. Product codes have been outlined where a state guideline exists. Signs are printed onto fluted material and can be interchanged within the multi-message frame to suit the application.

Queensland multi-message signs can also be produced from aluminium if requested.

Please note **images are for illustrative purposes only** and the actual sign design may differ slightly from state to state.

Legs for multi-message frames are sold separately - choose from three different types to suit your preference. Further details and specifications can be found on page 109.

Multi-message sign frames and accessories

Multi-message sign - frame only

Code	Description
RM-FO	Multi-message sign - frame only (excludes signs and legs)
- Fits a combination of multi-message signs depending on purpose. - Frame width accommodates signs up to 1200mm wide (or a combination of smaller signs to fit). - Top section holds signs 600mm high. - Bottom section accommodates signs 300mm high. - Suitable with use for a range of bi-pod leg styles (see below).	

See page 126 for multi-message sign flags

Bi-pod leg stands for multi-message and boxed edge signs

Code	Description
RS-BPSS	Bi-pod leg (single) - round bar style
RS-BPS	Bi-pod leg (single) - square tube style
RS-BPSF	Bi-pod leg (single) - folding style

*Bi-pod legs are sold individually.

Sandbag weights for multi-message and boxed edge signs

Code	Description
RS-SB3	Sandbag weight for multi-message frame or boxed edge signs
- Warn pedestrians: hi-vis yellow PVC bags ensure legs are seen and do not become a trip hazard. - Central hole to locate on upright spigot or on legs. - Webbed handle for easy transport.	

Sandbag weights are sold individually.
