

Danger signs are used to warn of a hazard which is likely to be life-threatening.

This category includes our core range of danger signs however we can also produce danger signs with custom messages upon request.

Our danger signs are made to the specifications of AS1319-1994 and are available in a variety of standard sizes. They can be manufactured on metal, polypropylene or corflute material, or can alternatively be supplied on self-adhesive vinyl labels. Aluminium signs are also available upon request.

Standard sizes and materials are listed in the table below each sign, along with the relevant part code. Other sizes are also available upon request, i.e. 900mm x 600mm.

Size (mm)	Material	Code
600 x 450	Metal	SSD-CTAM
