

Dangerous goods diamond signs

Hazardous warning signs in the form of dangerous goods diamond signs are important for areas where dangerous goods are transported or may be stored.

Our range of hazard signs include dangerous goods diamond signs, in addition to EMERGENCY INFORMATION PANELS used for both storage and transport.

The dangerous goods diamond signs are categorised according to their classification and can be added onto an emergency information panel with customised details - simply contact us to arrange this.

Our dangerous goods signs are made to the specifications of AS1319-1994 and are available in a variety of standard sizes. They can be manufactured on metal, polypropylene or corflute material, or can alternatively be supplied on self-adhesive vinyl labels. Aluminium signs are also available upon request.

Standard sizes and materials are listed in the table below each sign, along with the relevant part code.
