

**Emergency information signs are designed to indicate the location of or the direction to an emergency facility.**

Emergency information signs are usually green in colour with white text and icons. This range also includes two EMERGENCY STOP signs which are coloured red.

This category includes our core range of emergency information signs however we can also produce customised messages on request.

Our emergency signs are made to the specifications of AS1319-1994 and are available in a variety of standard sizes. They can be manufactured on metal, polypropylene or corflute material, or can alternatively be supplied on self-adhesive vinyl labels. Aluminium signs are also available upon request.

Standard sizes and materials are listed in the table below each sign, along with the relevant part code. Other sizes are also available upon request, i.e. 900mm x 600mm.

## EXTRA INFORMATION FOUND ON EMERGENCY SIGNS

Additional information to support pictograms is often found on emergency signs in order to meet minimum comprehension levels. Examples of this include arrows and explanatory text.

For example, it is recommended that washing times are added to signs regarding eyewash stations and emergency showers, as washing times are frequently underestimated.
