

PEDESTRIAN RAMPS

STRONG AND PORTABLE MULTI-PURPOSE PEDESTRIAN RAMP

Spill Crew's portable pedestrian ramp provides temporary access for pedestrians and trolleys whilst ensuring safe passage with minimum interruption to site works.

Spill Crew pedestrian ramps are:

- Anti-slip
- UV-stabilised - standard orange (other colours available)
- Polyethylene construction
- Able to fit to any curb
- Able to be bolted to the curb if required

Spill Crew's 100% non-slip polyethylene ramp provides superior corrosion resistance to a wide range of chemicals and harsh environments.

SPILL CREW PEDESTRIAN RAMPS

Code	Description	Size (cm)
DBPRO	Pedestrian ramp - orange	75 x 122 x 11cm

Spill Crew has manufactured a convenient ramp that allows operators to safely and easily access curbs and small steps.

This pedestrian ramp is ideal around exhibition areas, outside public buildings, hospitals and aged-care facilities.

The ramp can also be used by furniture removalists or on a construction or mine site.

Spill Crew's ramp is ideal for use with wheeled trolleys or to prevent a trip hazard for foot traffic on elevated areas such as street curbs.

This pedestrian ramp has been designed from durable and UV-resistant polyethylene materials with anti-slip technology.

At 122cm wide, most wheel-based trolleys can be easily manoeuvred over the ramp and pedestrians can pass easily without any bottle-necking.

The Spill Crew pedestrian ramp includes

- grip handle inserts to allow easy transportation
- an internal channel that covers and protects cords or any water pipes that may run alongside a curb

Pedestrian ramp is also available in other colours upon request
