

WIPE YOUR HANDS, MACHINE PARTS OR SOAK UP SMALL SPILLS WITH OUR TOUGH & ABSORBENT WORKTUFF WIPES

Ask yourself:

- Do your old rags spread more than they absorb?
- Do chemicals make your wipes fall apart?
- Are you paying too much for wipes?

Then Spill Crew's WorkTuff wipes are for you.

Spill Crew's polypropylene absorbent wipes hold together even after absorbing **six times** their own weight in liquid.

- Tough construction so they won't fall apart.
- Non-lint so no messy fibres left behind.
- General purpose absorbent will soak up all liquids such as coolant, degreaser, fuels, oils, grease or even water.
- Unlike rags, WorkTuff wipes are super-absorbent and take up far less room.

Use a wall-mounted roll holder to dispense your WorkTuff wipes.

- Eliminate the loose wipes and rags in your workplace or vehicles.
- Remove the problem of wipes being relocated around the workplace.

Install a Spill Crew roll holder in your workplace or vehicle:

- Quickly and easily find your wipes in a hurry
- Fast and simple to dispense
