

LITHIUM-ION CHARGING CABINET

Safely store and charge lithium-ion batteries in the workplace.

When the temperature of lithium-ion batteries get too high, so does the risk of battery electrolyte leakage or combustion. Our charging cabinets are fitted with two fans to draw in cool air and extract hot air cooling the temperature of the batteries, making the cabinets suitable for the hot Australian environment.

AUSTRALIAN MADE

Proudly designed and manufactured in Australia.

FIRE CONTAINMENT

Manufactured with a double wall construction with 40mm thermal barrier to shield from the dangers of lithium-ion fires.

BATTERY COOLING

Fitted with two fans to draw in cool air and extract hot air making them suitable for the hot Australian climate.

FEATURES

- 24 charging points
- 10amp supply
- Fitted with two IP54 rated exhaust fans with a flow capacity of 55m3/hr
- Double wall construction with 40mm thermal barrier
- Self-closing doors with flush mount handle
- Lockable doors for added security
- Built-in containment sump to capture any leaks of electrolyte
- All danger and warning signage is provided
- Designed and manufactured in Australia
